Researchers, including a team from IMB, have identified a molecule in cone snails that could act against neuropathic pain. The discovery was published in PNAS today: <http://bit.ly/1UW1HeL>

Pictured below are (l-r) Peta Harvey and David Craik from IMB with Sulan Luo and Dongting Zhangsun from Hainan University.

### Killer sea snail a target for new drugs

University of Queensland pain treatment researchers have discovered thousands of new peptide toxins hidden deep within the venom of just one type of Queensland cone snail.
